For Immediate Release

Hyde Engineering + Consulting, Inc., Opens European Headquarters in Dublin, Ireland

Boulder, CO, March 31, 2010—Hyde Engineering + Consulting, Inc., (Hyde) today announced the company's European expansion with the opening of a regional office in Dublin, Ireland. Will Czerniak, Director of European Operations, is responsible for all of Hyde's European activities. Hyde's global client base already includes the world's "best-in-class" pharmaceutical manufacturers. Hyde will continue to grow and expand the company's services and staff, providing local expertise to their long-time clients from the company's Dublin headquarters.

"Ireland has played a significant role in providing great talent and manufacturing capacity for our clients, so Dublin was the obvious choice from which to centralize our European activities," said John Hyde, chairman and founder of Hyde. "Will and his team will continue to provide high level services and expertise to our expanding client base."

Hyde delivers high quality services to the growing manufacturing sector of the pharmaceutical and biopharmaceutical industries globally. The company is recognized as a leader in providing high-value services that are tailored to meet clients' budgetary, regulatory, and scheduling needs. The new European headquarters in Ireland will provide local staffing and service expertise for engineering, design, commissioning, qualification, and compliance projects throughout Europe.

With in-depth knowledge and industry experience, as well as a keen understanding of the regulatory FDA/EMEA risk-based management approach, Hyde provides added value for clients both within the US and globally.

"In today's economic climate, our clients require greater efficiencies and significant reduction in the cost of goods," said Simon Forder, the company CEO. "With our European expansion we can now work more closely with facility manufacturers, providing new paradigms for engineering design and operations for compliance."

About Hyde Engineering + Consulting, Inc

Hyde Engineering + Consulting Inc.'s primary expertise is in the engineering, commissioning and validation of manufacturing equipment/ facilities and clean utility systems for the pharmaceutical and biopharmaceutical industry. Since 1993, Hyde has worked as an integral part of project teams for clients and equipment vendors resulting in the successful construction, commissioning and validation of facilities and equipment.
