Todd McLaren Joins Hyde Engineering + Consulting

Boulder, CO, October 23, 2008—Hyde Engineering + Consulting, Inc. (Hyde E+C) is pleased to announce that Todd McLaren has joined our team as Senior Vice President of Marketing and New Business Development with overall responsibility for the East Coast. Todd's experience in the pharmaceutical and biotechnology industries spans more than 24 years. He has been instrumental in leading engineering and construction companies in supporting the sector.

Prior to joining Hyde E+C, Todd served as Vice President, Sales and Marketing, with BioKinetics, where he was involved in a management-led buyout from Alfa Laval (the company has subsequently been purchased by Foster Wheeler). During his tenure there Todd was heavily involved with the emergence and market acceptance of modularization as a project delivery methodology and was a strong proponent for bundled products and services as a market differentiator.

Prior to BioKinetics, Todd held senior roles in program management and business development with CRB Consulting Engineers and Kinetic Systems. Todd's extensive experience also includes product management roles with Enprotech, Harris Lo-Temp, and Cryogenic Systems, Inc., where he served as Marketing Director representing L'Air Liquide of France.

"We are very pleased to have Todd join our organization," commented Simon Forder, Principal Consultant and CEO of Hyde E+C. "Todd's knowledge of the current trends and changing engineering needs of the industry will serve our clients and Hyde E+C as we expand our national presence."

Todd's wealth of experience spans many global projects and he has been an active participant and chapter board member of ISPE since 1992. Todd graduated with a B.S. in International Business Administration from Indiana University.
