## **For Immediate Release**

### **Hyde Engineering + Consulting, Inc., Announces Organizational Changes**

**Boulder, CO, November 10th, 2011**—Hyde Engineering + Consulting, Inc. (Hyde) today announced organizational changes to their US business that will more closely align the corporate structure with the company's growth strategy for 2012. Hyde's global client base already includes the world's foremost pharmaceutical manufacturers. Hyde will continue to grow and expand the company's services and staff, providing local expertise to their long-time clients both within the US and overseas.

The organizational changes include the promotion of Mr. Hardip Dosange to Senior Director of Operations. This role is a key component in helping drive the company's growth. Reporting directly to Mr. Dosange, Mr. Kalpesh Patel has been promoted to the role of Regional Manager Mid-Atlantic Operations, and Mr. Neil Hastings assumes the role of Principal Consultant with responsibility for Project Management.

"These new appointments will further streamline the company's strategic focus and align the executive team with our customer-focused services and solutions," said Simon Forder, CEO of Hyde. "Hardip, with the support of his regional management team, will work directly with me and the executive committee to ensure that Hyde continues to provide high quality services to our expanding client base."

Hyde delivers high quality services to the growing manufacturing sector of the pharmaceutical and biopharmaceutical industries globally. The company is recognized as a leader in providing high-value services that are tailored to meet clients' budgetary, regulatory, and scheduling needs. With in-depth knowledge and industry experience, as well as a keen understanding of the regulatory FDA/EMEA risk-based management approach, Hyde provides added value for clients both within the US and globally.

"Understanding the needs of our clients and working more closely with them is a key focus within our organization", added Mr. Forder, "I'm confident these management changes will better equip the organization to fulfill their needs in an effective and expedient manner."

#### **About Hyde Engineering + Consulting, Inc**

Hyde Engineering + Consulting Inc.'s primary expertise is in the engineering, commissioning and validation of manufacturing equipment / facilities and clean utility systems for the pharmaceutical and biopharmaceutical industry. Since 1993, Hyde has worked as an integral part of project teams for clients and equipment vendors resulting in the successful construction, commissioning and validation of facilities and equipment.
